

BUSINESS ADMINISTRATION INFORMATION SYSTEMS CONCENTRATION

Information systems professionals equip organizations with the technology systems and processes to enable effective performance.

At the intersection of technology and business, information systems (IS) is crucial for optimizing processes, aiding decision-making, and driving efficiency across industries.

UCR trains our IS students with cutting-edge technology, aligning curriculum and industry needs for hands-on experience. UCR's Business Administration with a concentration in information systems curriculum focuses on the following three learning objectives:

1. Apply technical and managerial concepts in information systems
2. Integrate functional information systems into business operations
3. Attain advanced knowledge in data storage, flow, and analysis within information systems

ASSOCIATION FOR
INFORMATION SYSTEMS
AT UCR

JOIN A PROFESSIONAL ORGANIZATION

UCR's chapter of the Association for information systems is a business student-run organization that aims to develop professional and technical skills valuable to those in information systems and related fields through hands-on workshops, networking opportunities, and guest speakers and panels. Past session topics have ranged from workshops on Python, machine learning, SQL, and interviewing best practices to discussions on business tech trends.
